

100% Legal "Backup" Software

Psssst, want some "legal" backup software?

Have you ever seen e-mails and web sites carrying details and announcements such as the following?

"100% LEGAL - We do not sell Warez, W8rez, War8z. We only provide you with a backup service for software which you CLAIM to already own.

Notice: Any software program that we provide is on the understanding that you own the product already and have a License to use it. We provide you with a backup to safeguard your original copy. Proof of purchase of the Original Product may be requested."

Yeah, right..... and we believe in "the tooth fairy" too!

First take note of this statement!

IT IS NOT 100% LEGAL !

That's a FACT!

Second, when you read your licence conditions (EULA) you will very clearly see that what is being offered by these sites is a load of legal mumbo jumbo and rubbish.

These sites are into "entrapment mode" if you believe what is being said about these backup CD's being "legally" available for your business!

Backups can ONLY be generated from the original source media, by you, in-house.

Ask yourself the question?

How did they get a copy of your licensed media in order to offer the backup they claim you can buy!

It's a sham, and if you buy from these sites then you are very foolish and run the risk of paying over and over for the software, not to mention all the legal fees available as remedies to the vendors who may catch you and your staff "in the act".

The bottomline?

Be VERY wary of sites offering full "backup" CD's for the following (and many other software eg; Oracle, Autocad, Macromedia, Borland and Corel products, Novell etc) which they claim is legal!

Here are some examples of "backups" available for sale on the Internet!
